

Greetings

We took part in “2015 EOS/ESD Symposium For Factory Issue-Korea”, held in Korea. I was afraid of MERS, but influence of MERS was finishing when we were in Korea. I felt that visitors from another countries were less, but many Korean business people joined this symposium. I think we could have a good opportunity to open a new market in Korea.

Thanks to our agency, we had a good time with our customers who work in Korea.

I would like to advance with our business and technology making a new market in Korea, searching what our customers need and cooperating with them.

President Takumi Hasebe

● Topics 1

ESDA Symposium in Korea

We exhibited “2015 EOS/ESD Symposium For Factory Issue-Korea” was held in COEX, Korea from 2nd to 3rd of July.

EOS/ESD Symposium is an international meeting to discuss how EOS and ESD make an influence to device and electronic system.

I was afraid that the symposium will open or not and also people will come or not, because of influence from MERS. But many visitors came and joined the symposium for 2 days and I felt Korean market has a high quality and power through communication with them. ↗

EOS/ESD Symposium for Factory Issues

Inside the Symposium 1

Inside the Symposium 2

The Symposium has a technology meeting and exhibition as current.

12 companies participated in the symposium and only Hanwa from Japan joined it.

Electrostatic Image System

We exhibited Electrostatic Image System, called e-Scope and CDM Tester.

CDM Tester

I had a very nice time with many visitors and a great opportunity to make a new market with them.

Semiconductor market is still not more powerful than before in Japan.

I would like to open a new market in abroad more. Thank you for visiting our booth and supporting us always.

Equipment investment support was accepted from the National Federation of Small Business Associations.

The Small and Medium Enterprise Agency invited the public to join equipment investment support from 13th of Feb. to 8th of March.

We applied equipment investment support for making a new production line of Electrostatic Image System, called e-Scope to the National Federation of Small Business Associations. The association had 17,128 applications and 7,253 applications of all passed.

We will supply e-Scope more using the new production line. For more details of e-Scope, click down below.

Joined Job Fair, “Tenkaichigosetsu”

One event, “Tenkaichigosetsu” was held in Osaka on 17th of July. Companies which have high quality, technology and service, and are located in Kinki area, joined this event.

It was heavy rainy and very windy, because of a typhoon, named “Nangka”. Some trains were canceled. I was feeling that visitors would be less than

HANWA booth

expected, because of weather and public transportation problems, but 1,043 people came this event.

We joined this event and introduced our company to visitors at our booth. Thank you for visiting our booth.

● Column

I read one article, “One person out of three can’t say Arigatou”. “Arigatou” means “Thank you” in Japanese. Not only children but also adults can’t say “Arigatou”. It is only five letters...I asked myself and realized that I sometimes don’t say the word, because of feeling shy or missing a timing to say it. I reflect on myself.
