

Greetings

I went to the Myoshinji temple, where is located in Kyoto, Japan, to watch Shorea robusta. The flower has a strong relation with Buddhism. The flower is showing us "All life has limitation. So, we must spend our lives with no regret.", because the flower blooms in the morning and it falls in the afternoon. Its life has one day. I spend normal life as usual always, but I strongly felt that I would like to do what I do as best.

The rainy season is over and full summer came in Kinki region. I would like to spend summer season feeling summer feature and enjoying meeting new people.

President Takumi Hasebe

The 7th APEMC 2016

The 7th APEMC 2016 was held in Shenzhen, China, May 18th to 21st. This conference covers Electro-Magnetic Compatibility. We joined conference and exhibition for the first time.

Shenzhen is a city where takes about one hour from Hong Kong International Airport by train or bus. I went there by a ferry.

At the conference, Mr. Sawada from Hanwa presented a paper. Also, we exhibited Electrostatic Imaging system and Portable ESD Tester.

Shenzhen city

APEMC2016

At the conference

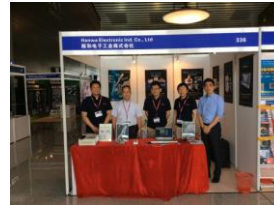

Mr. Sawada's presentation

This time is the first time for me to visit Shenzhen city. There are many high buildings there, because it is near Hong Kong. It looked great city for business, but unfortunately I couldn't go out often, because of rainy while staying there.

Thank you very much for your feedback and visiting our booth. We aim to provide good service with your feedback.

We are looking forward to seeing you again soon!
